Engraving

Especially in the luxury segment, customers expect a special shopping experience. Stationery or giveaways inscribed on the spot surprise and inspire people. I love showing off my skills in that way and I do my best work when I'm having fun.

▲ Live

Live calligraphy and engraving dazzles and impresses. In a digital world, getting to take home a unique, handmade piece is special and beautiful.

Calligraphy

A little something extra: I personalise invitations, address envelopes in calligraphy and letter on place cards, gift tags or branded products. Customer animation and brand activation on site is perfect for special shopping days, product launches, at events or just because your POS deserves something extra.

PRE EVENT STUDIO WORK

Studio work

I'll put the finishing touches on your stationery. Handwritten addresses on envelopes or just your guest's name on a card – this is how you show your guests how much you appreciate them.

I'm also happy to handwrite your business correspondence, such as your Christmas cards or business envelopes.

◀ ▶ Personalisation

By hiring a calligrapher to address your envelopes or write your letters, you can show your clients what they mean to you. Every piece is unique and will never look the same again.

About me

Tintenfuchs (translation: ink fox) is me, Natascha Safarik, a self-employed calligrapher in Vienna who has been at it for almost a decade. I feel most comfortable with a pointed pen in my hand and enjoy sharing my passion for calligraphy with you and your clients. And anyone who will listen, really.

I work with clients from all over the world and feel as comfortable in a little black dress or business casual as in a flannel shirt and sneakers.
